

Dear Sir/Madame,

I am in support of bill 6847, but request a modification to this proposed legislation in section 5(c). It must include treatment plans developed by Board Certified Behavior Analysts.

The current bill states that treatment plans may be developed by a licensed physician, licensed psychologist or a licensed clinical social worker. This section of the bill should also include a Board Certified Behavior Analyst to the list of medical professionals that can develop treatment plans for individuals diagnosed with Autism Spectrum Disorder.

I am a mother of a daughter with autism who attends CCCD in Milford. I support this bill and feel strongly that Behavior Analysts (who work with my daughter every day) should be included in this bill as stated above.

Many thanks for your time.

Most Sincerely,

Maria Dominici
